ZYPHA -The Ultimate SME Business Full Service Cloud Solution

Zypha eliminates the need for IT capital expense by providing a utility based IT service using "IT virtualization". You don't need hard drives, servers, or back-up devices in your office. You can access your desktop in Zypha's secure cloud, containing all your files, folders and programs through your existing devices or through our optional thin client access equipment. All you need is an internet connection, screen, mouse and a keyboard. You can also connect using as a tablet or phone but in a quicker more efficient way.

- Your critical business information is secure, automatically backed up, your Zypha provided software is automatically updated. You can access your information 24/7/365 through your computer or any internet connected device such as a tablet or smartphone anywhere in the world.
- The Zypha service supports all of your IT requirements, including full support and is paid for as a monthly fixed operating cost, instead of unpredictable and heavy capital cost. (OPEX vs CAPEX)
- Zypha can save the customer 10-30% based on their current I.T. costs.
- The migration to the Zypha solution is completed with minimal disruption, fully planned, supported and communicated.
- We provide onsite personnel for your support during your initial experience of using the system. We understand it is your business, and empathize and respect your requirements and needs.
- The solution also provides a high level of business continuity enabling the customer to access the system securely and efficiently from any location on any device, utilizing any internet access including 3G\4G.
- The customer's power usage is considerably less and the customer's environmental footprint is greatly reduced, not only by saving power but also in I.T. equipment manufacturing and disposal.
- We supply strategic advice offering support and suggestions on how to better use I.T. to enable your business growth. We have exciting new offers including our ground breaking Zypha Box technology.
- We help your business grow, by offering ways to better utilize your office space and enable business growth with lower overhead.
- We use enterprise class, secure, stable, redundant hardware and software components to support your business systems.
- We offer a quick and easy way of improving your businesses efficiency, typically our customers quote their experience of a 20% increase in productivity by converting to the Zypha solution.
- It's everything your I.T. should be, efficient, enabling and easily scalable up or down.
- Zypha is a Microsoft Global partner and is fully authorized and capable of reselling MS365 and Azure, but choose, instead, to utilize our subscription arrangements with our software providers, so we can offer a service, based on our own technology, hosted in our own data centers.
- We can then ensure that ALL of our customer's critical I.T. provision is in the same geography. By being in the same data center and on adjacent equipment enables us to provide the highest performance, speed, security and data protection, within the environments appropriate to each of our customers. In addition the service is then wholly on us, our responsibility but also our authority, we make the decisions on service for our customers, not a third party.
